

NeuralCare AI

ESG Policy Document

Environmental, Social & Governance Framework

Confidential — For Investor Use Only

June 2026 | Singapore

NeuralCare AI is committed to responsible business practices across Environmental, Social, and Governance dimensions. This document outlines our current policies, targets, and accountability mechanisms as of June 2026.

E — Environmental

NeuralCare is a software-first business with a minimal direct environmental footprint. Our primary environmental impact comes from cloud computing energy consumption.

Policy Area	Current State	2027 Target	Methodology
Carbon footprint	AWS SG region: ~18 tCO ₂ e/yr	Net zero via AWS carbon offset	AWS Customer Carbon Footprint Tool (monthly)
Office energy	WeWork hot-desk (no owned space)	Remain asset-light	Landlord ESG report
Hardware	Laptops refurbished where possible	100% refurbished fleet	Procurement policy enforced Q4 2026
Paper usage	Digital-first; <500 pages/month	<100 pages/month	Office supply invoices

We do not make environmental impact claims beyond the above measured metrics. All carbon offset purchases are verified under Gold Standard certification.

S — Social

Access & Inclusion

We offer a Means-Tested Subsidy Programme: users who qualify (household income < SGD 2,500/month) receive 80% subscription subsidy, funded by enterprise client CSR contributions. As of June 2026, 312 subsidised users are active (10% of paid base).

Therapist Welfare

All therapists are classified as independent contractors with transparent commission disclosure (85% of session fee to therapist, 15% platform fee). We provide mandatory clinical supervision (2hrs/month), peer support groups, and a Therapist Wellbeing Fund covering counselling expenses up to SGD 600/year. Supply chain is entirely within Singapore, Malaysia, Thailand, and Indonesia — jurisdictions with established labour protection frameworks.

Workforce Diversity

Metric	Current
Female employees	58% (11 of 19 full-time staff)
Female leadership (VP and above)	67% (4 of 6 senior leaders)
Nationalities represented	8 (SG, IN, MY, PH, TH, CN, NG, AU)
Named diverse board members	Dr. Aisha Rahman (CEO, Malay female); Dr. Tan Wei Ling (Chinese female advisor)

Data Privacy

NeuralCare holds a comprehensive Privacy Policy (published at neuralcare.ai/privacy, version 3.1, May 2026). User mental health data is encrypted at rest and in transit, never sold to third parties, never used for advertising, and retained for maximum 7 years post-account deletion per PDPA (Singapore) requirements. Users have full right to export and delete their data within 48 hours of request.

G — Governance

Board Structure

Board decisions require simple majority. No single founder holds veto rights. The board meets quarterly. Financial statements are reviewed by an independent auditor (Baker Tilly Singapore) annually.

Financial Controls

All financial projections in investor materials are based on stated assumptions documented in our financial model (available in data room). Revenue figures are reconciled monthly against Stripe and Xero. No inconsistencies exist between documents in this data room — all figures reference a single source-of-truth model.

Team Verification

All co-founders' credentials are independently verifiable. LinkedIn profiles are maintained and consistent with CVs in this data room. Professional references available upon request. Medical registration numbers: Dr. Aisha Rahman — SMC Reg. No. M2014-00412; Dr. Tan Wei Ling — SMC Reg. No. M1989-00178.

ESG Reporting Cadence

NeuralCare commits to annual ESG reporting aligned with GRI Standards Core option from FY2027 onwards. Board-level ESG committee established Q1 2026, chaired by co-founder Priya Nair.
