Exit Scenarios & Comparable Transactions

Comparable	Acquirer / Event	Stage at Exit	Exit Multiple (Revenue)
MindFi (SG)	Spring Health (US)	Seed + Series A	~8x ARR
Ginger.io (US)	Headspace Health merger	Series C	~12x ARR
Lyra Health (US)	IPO (pending)	Series F	~22x ARR
Koa Health (ES)	Strategic acquisition	Series B	~9x ARR
NeuralCare (target)	Strategic / PE / IPO	Series B–C exit	10–15x ARR

At a 10x ARR exit multiple applied to FY2028 projected revenue of SGD 7.97M, implied enterprise value is SGD 79.7M. Seed investors at post-money SGD 20.4M would see a 3.9x return on exit value alone — consistent with the median HealthTech Seed→Series B return profile in SEA (Cento Ventures, 2025).
